Financial Performance Analysis & Business Insights (2010 – 2022)

Revenue Growth, Profitability and Margin Analysis Across Major Tech Companies

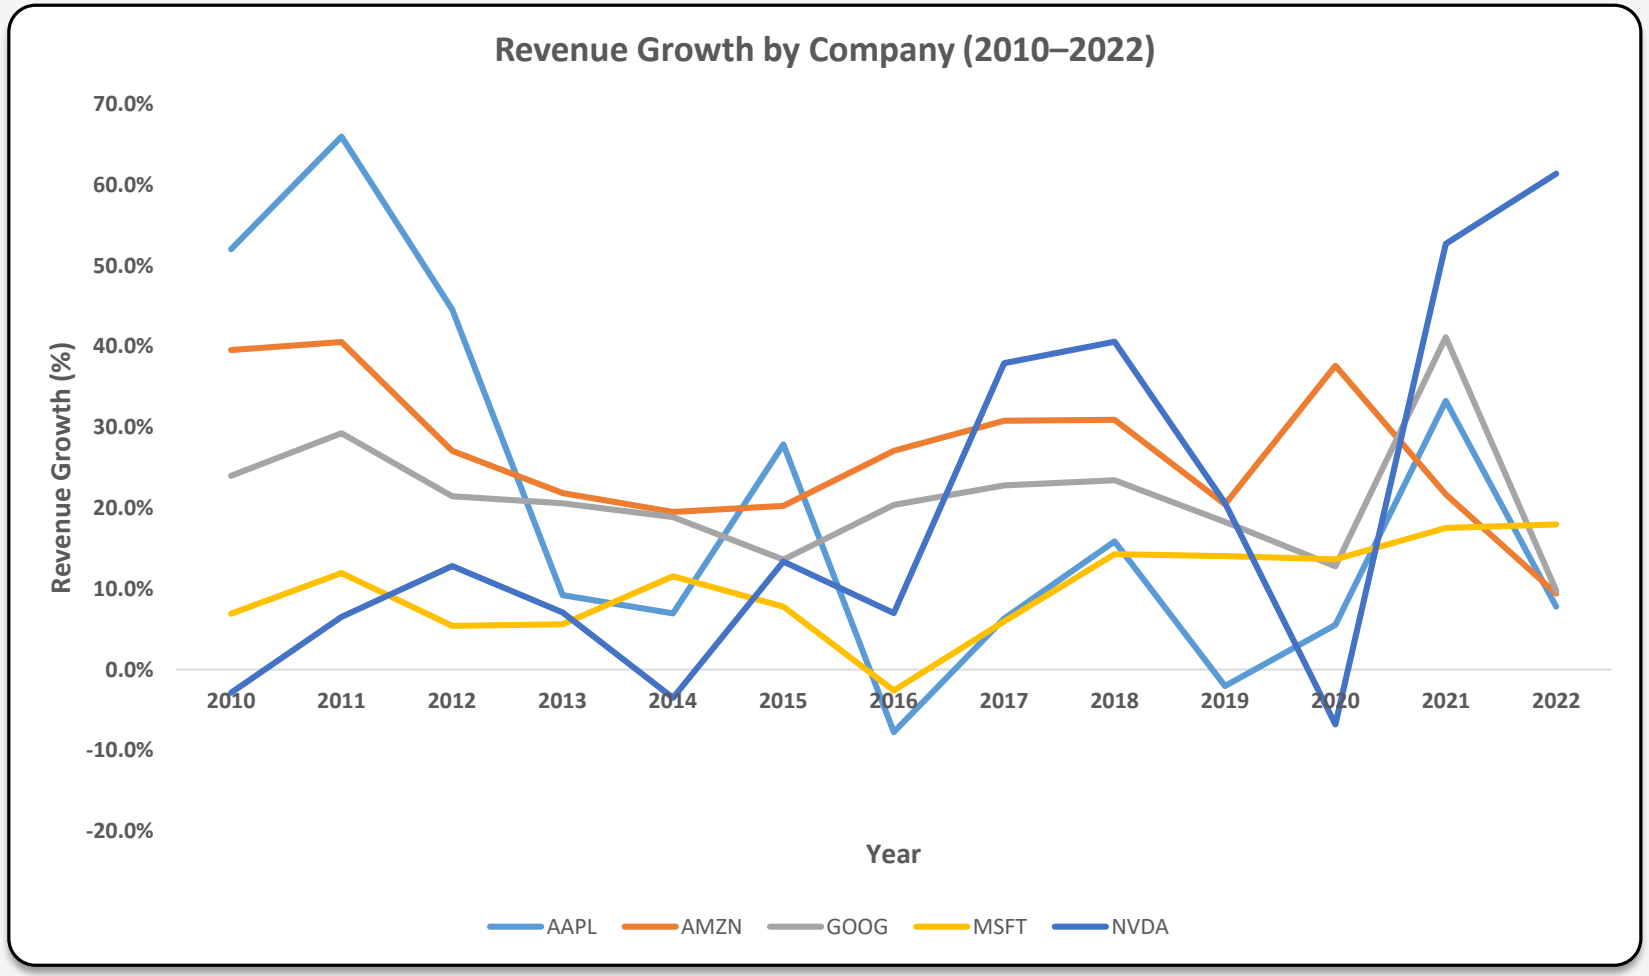
Evmorfia Alexiou

End-to-End Financial Data Analysis Project

Overview

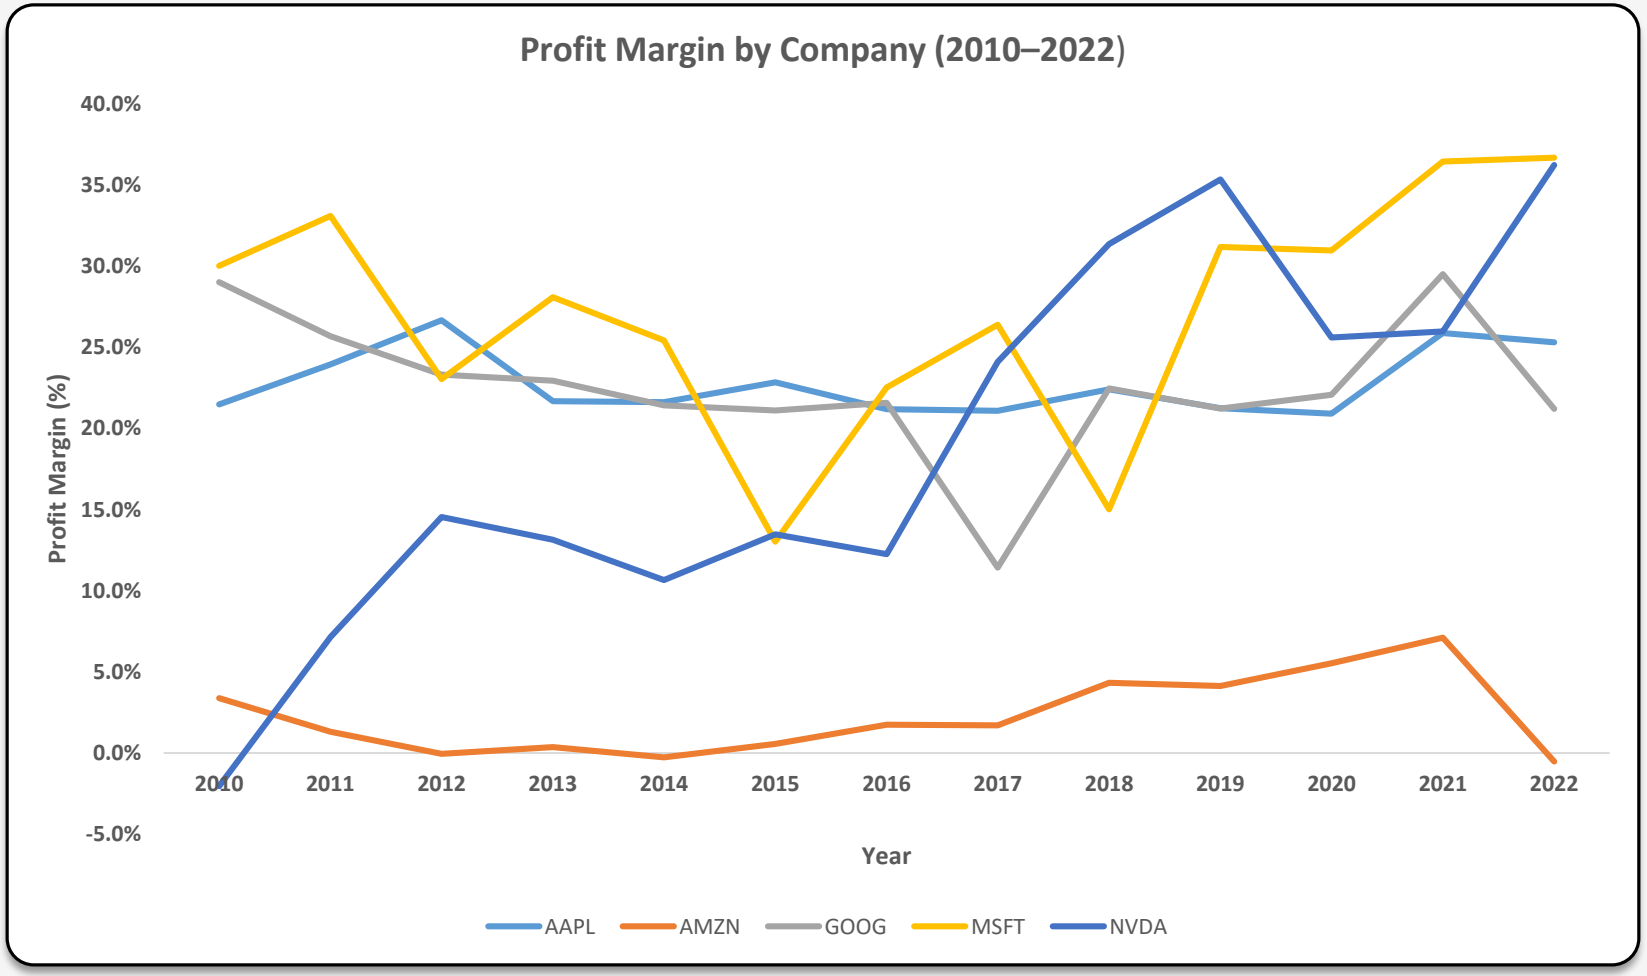
- Comparison of 5 major tech companies
- Analysis of growth and profitability trends
- Focus on Revenue Growth, Profit Margin and EBITDA Margin
- Objective: Identify differences in growth patterns and profitability strategies across companies

Revenue Growth Analysis



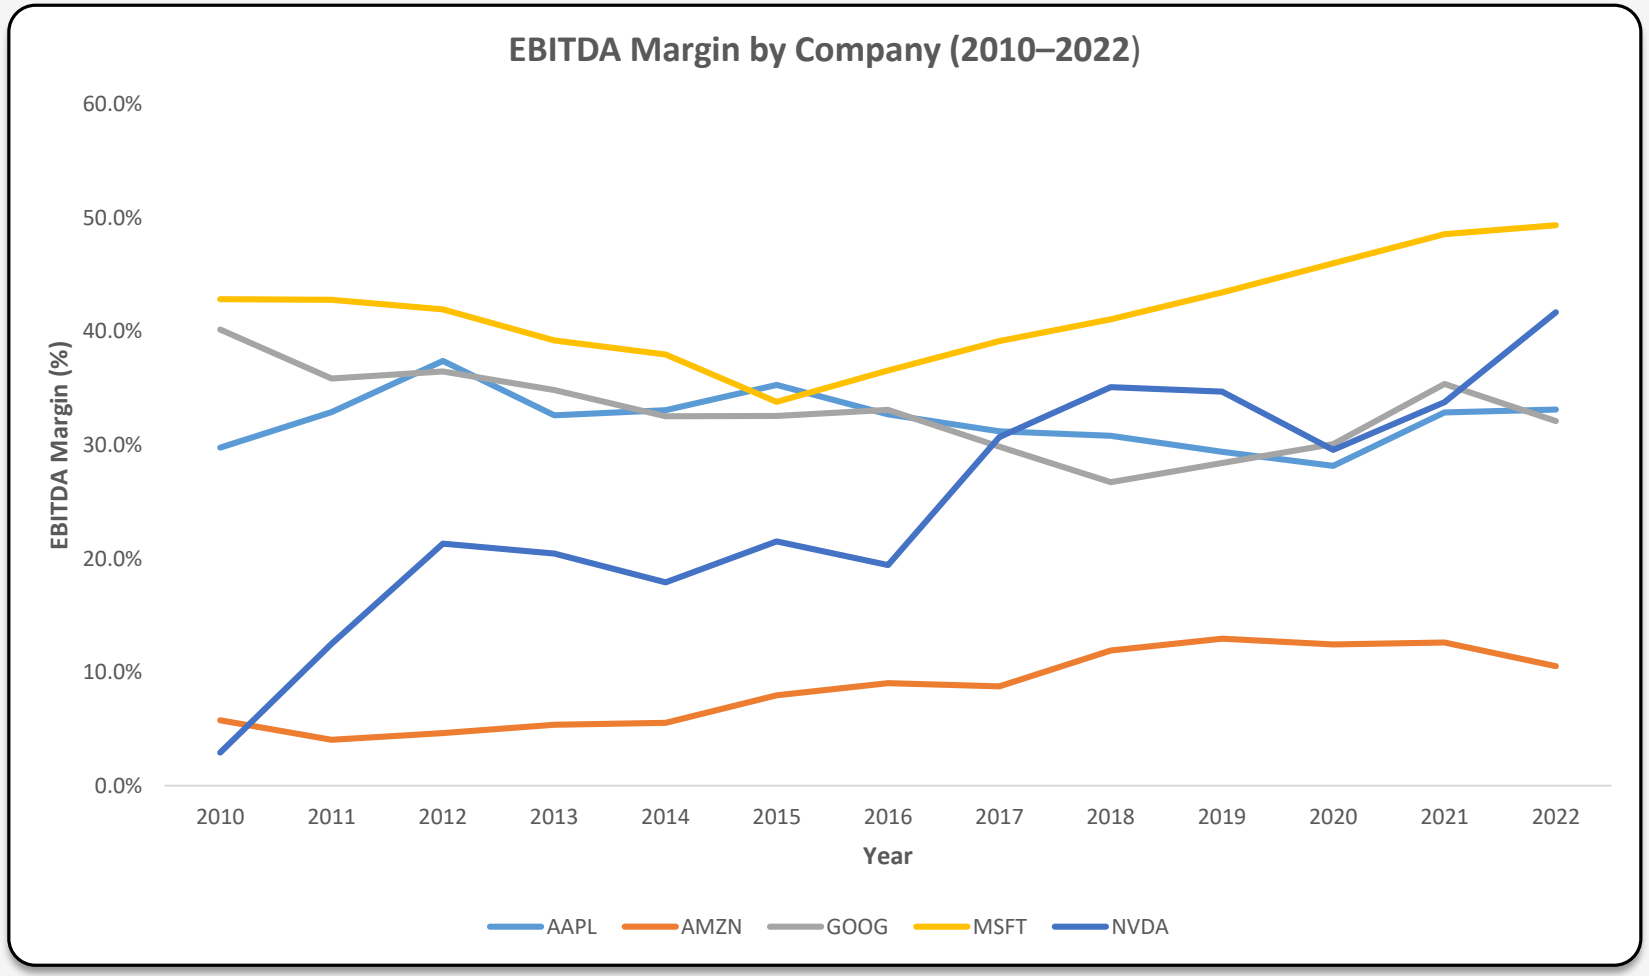
- NVDA exhibits the highest volatility with strong growth spikes in recent years
- AMZN and GOOG show relatively stable and consistent growth patterns
- AAPL demonstrates more variability with noticeable fluctuations over time
- MSFT shows moderate growth with some fluctuations

Profit Margin Analysis



- MSFT and NVDA show strong margin expansion over time
- AAPL maintains relatively stable margins, while GOOG exhibits some fluctuations
- AMZN consistently operates with significantly lower margins than peers

EBITDA Margin Analysis



- MSFT shows the highest and steadily increasing margins
- NVDA demonstrates strong improvement over time
- AAPL remains relatively stable, while GOOG exhibits some fluctuations
- AMZN consistently maintains lower margins than peers

Key Takeaways

- Large tech companies maintain strong profitability overall, despite fluctuations in growth
- MSFT and NVDA demonstrate the strongest margin expansion trends over time
- AMZN consistently operates with lower margins, reflecting a different business model

Overall, the analysis highlights how different business models drive distinct growth and profitability outcomes.
